ASSIGNMENT 2 EXPLANATION

1. I identified duplicate in the Enrollment ID column and removed the duplicate because each student should have unique enrollment Id, then I deleted the entire rows
2. I identified blanks and duplicates in the student's id column then I check through the student master sheet after arranging it in ascending order I notice the student id in both sheets does not tally so I highlighted the duplicate with red color and then fills the blanks as unknown
3. I identified blanks in the student's name column, Gender Column, since I knew that the student id does not tally, I fills the blanks with unknown
4. I identified in the age column that there were some ages written in decimals I solve this with find and replace then fills the blanks with unknown
5. I identified blanks in the State column then I make use of IF + XLOOKUP functions with Location master sheet as my sources which look into the cell and returns "unknown" if the cell is empty and if not, it looks up for their State and returns it
6. I identified blanks in the City column and that most does not tally with their state so I clear all content then personally I created a table in the location master sheet that contain the correct state and city then I make use of IF + XLOOKUP functions with the new table in Location master sheet as my sources which look into the cell and returns "unknown" if the cell is "Unknown" and if not, it looks up for their City and returns it.

7. I identified in the branch column that it does not tally with the state so I make use branch master sheet to fill the right branch for the right state
8. I identified blanks in the institution column I filled it with unknown since there no master sheet in correlation with it
9. I identified blanks in the subject column make use of the subject master sheet to fill the right subject to the right education level
10. I observe that they are extra spaces in my text data and inconsistent casing so I make use of trim and proper to clean the extra space and change the casing in all my text data
11. In the score and attendance columns I notice a score with minus then change it to normal then fills all the blanks with zero
12. I notice typography error in the Tuition Fee (NGN) column then corrected it with find and replace and fill the blanks with zero
13.I notice blanks in the amount paid (NGN and Payment Status column I fill the blanks with zero
14.In the payment method column USSD also mean bank transfer so I change the USSD to Bank Transfer to ensure simplicity of data and fill all the blanks with unknown
